Postal Address	P.O. Box 382, Maroochydore 4558

**MERRY CHRISTMAS and  
HAPPY NEW YEAR**

**TO ALL OUR MEMBERS AND OTHER SOCIETY FRIENDS**

## CULTURAL MEETING

The December meeting will be held on Tuesday 3rd at 7.30pm.

The Cultural Meeting is held on the 1st Tuesday of the month at **St Peter's Anglican Church Hall, Church & Beach Roads, Maroochydore** at 7.30pm. All plants are to be tabled by 7.00pm for judging. Members and visitors are most welcome. The society AGM is held at the October cultural meeting.

### Summary of Phalaenopsis Presentation by F Lenz

#### Shadehouse

- In a rectangular shaped shadehouse, the longest sides being the north and south facing.
- The south, east and west sides and the top covered with two layers of 50% shade cloth separated by solarweave.
- The northern face has two layers of 50% shade cloth only.
- A gable roof allows air movement upwards thus providing good plant transpiration.
- Hygiene the most important thing to consider in the maintaining of healthy plants.(no other plant under the benches)
- Where possible use clear plastic pots (so you can see the condition of the roots).

#### POTTING MIX

- Orchid bark - small plants 5mm, other size- medium.
- Jumbo size perlite
- The above mixed together when wet.
- Polystyrene chips are placed in the bottom of the pot to allow drainage.

#### WATERING

- Early morning- winter before 10am, summer before 9am.
- I water the plant allowing water to run through the pot, **but not the top leaves or crown**. I use a soft spray from a hand wand. This is done once a week.
- In summer an additional two waterings are done with fertiliser added. Winter only one watering with a fertiliser added.

#### FERTILISING

Twice a week in summer, spring and autumn and once a week in winter.

- Alternate between different NPK ratings.

- A higher N rating and a lower K rating are used November to March and these are reversed April to October
- An organic fertiliser can be added several times during the growing period.
- **MAINTENANCE**
- Fungal and insecticide damage is devastating for Phalaenopsis plants and the inflorescence.
- Regular preventative measures are necessary to ensure healthy plants.

- **RE-POTTING**

- A general rule is to re-pot Phalaenopsis every two years, but this can alter due to circumstances such as excessive roots outside the pot, disease problems and damage due to falling off the bench.
- Treat plant with fungicide and later a hormone prior to re-potting.
- **Phalaenopsis ARE LIKE US THEY NEED FOOD AND WATER TO GROW AND SURVIVE AND GENERALLY LIKE TO BE DRY.**
- **Phalaenopsis PROBLEMS OCCUR IN PLANTS DUE TO LACK OF FOOD, WATER AND SUN AND PROLONGED WET.**

### Purchasing Phalaenopsis

Check the AOC Judging Rules (online) so you are aware of the characteristics of a good phalaenopsis flower. Always buy plants from reputable growers and ensure that they are labelled.

**Good reading** Check out the recent articles relating to Phalaenopsis in the recent newsletters of Hervey Bay OS and North Queensland OS.

### PLANT of the MONTH by Col & Bev Haack

We've had *D. Big Alex x D.spectabile* for about four years. Last year it only had one spike so the display this year was fantastic. The flowers never had any fragrance until this year. The pseudobulbs are about 250mm - 300mm tall with leaves extending above that. They are easy to grow and flower well. We reduce watering in winter because the mix does not dry out as fast. We only water when the mix dries out. We pot in the same mix as our other dendrobiums. The flowers last up to 7 weeks. The flowers have three lobed lips and a prominently raised callus grows on the top of the spikes that emerge from the apex of club shaped pseudobulb. Each pseudobulb may produce one or two spikes among the leaves that grow at the top of the pseudobulb and each spike will produce a few full flowers.

## Christmas Lunch at Rivershore Resort

- **When** Saturday 14<sup>th</sup> December
- **Location** Rivershore Resort, David Low Way, Diddillibah
- **Time** 11.30am
- **Where** Driftwood Cafe, Restaurant and Bar
- **Cost** \$22 per person, choice of mains and a set dessert
- **Drinks** Purchase your own at the Bar
- **RSVP** To Desiree **no later than 3<sup>rd</sup> December**

## DECEMBER MEETING

Come and enjoy our final fun meeting for the year. Please bring a plate of festive time food for all to share. Don't forget to bring your Banana money or Orchid Recession Dollars for our plant auction.

## 2020 STOCQ CALENDAR

EVENT	LOCATION	SET UP	SHOW DAYS/TIMES

## Notes from the November meeting

Firstly Marg/ Fred has been researching new MOS shirts and at our December meeting Marg will have more information on colours, and hopes a short list can be whittled down to an agreed colour, and orders start to be placed.

Thank you everyone who has participated in 2019 Cultural meetings, setting up and packing up at meetings and shows, catering, banking, organising raffle prizes, doing talks, sharing culture experience, bringing in your orchids for us all to see. This year there has been a nice trickle of new members which is wonderful. Our Society is a mix of growers – everyone has their unique likes and experience – but we all enjoy the camaraderie of sharing our love of orchids.

**Annual membership fees are now due. Members \$10, Couples \$15**

## Orchidwiz

The Society now has Orchidwiz software so we are now able to check plant names and determine if orchid crosses have been registered and renamed. The Secretary and the Editor each have a copy.

## Bush House Visit by Desiree Watson

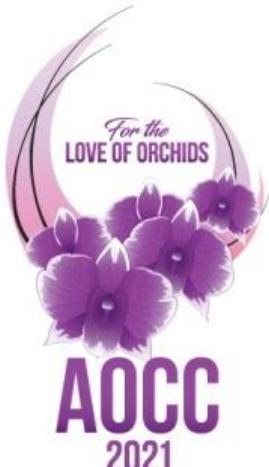

In October members had a bush house visit with Cath and Doug Wanka. It was a great day as Doug had lots of fabulous orchids to show us. Here are some notes on what Doug had to say about his orchid culture.

Doug used Campbells Diamond Special K Plus and Campbells NitroCal, fortnightly in summer. He uses a systemic fungicide monthly, Sprayfhos, which does not spot the flowers. The media he uses is pine bark, which he boils. And while he doesn't get many insects due to the moist environment, he uses supracide (Methidathion). I asked him especially about his growing of soft cane dendrobiums. He grows the soft canes in coconut fibre as it is more moist. He uses a balanced fertiliser not a high nitrate fertiliser. They get lots of water in October while they are growing, to grow new canes to flower next year. They need lots of sun to flower well.

2021

## ► 22nd AOC Conference and Show - For the Love of Orchids

1 - 5 September 2021, South East Queensland: at the Logan Metro Sports & Events Centre, about 30 minutes by road south of the Brisbane CBD and airport.

The next AOC Conference and Show (AOCC 2021) is being staged as a joint venture by orchid societies of South East Queensland at the modern Logan Metro Sports and Event Centre in Crestmead, around 30 mins south of the Brisbane CBD and airport.

AOCC 2021 will begin for registrants with the Thursday (2 Sept. 2021) evening Opening Ceremony. Show patrons will be able to admire orchid displays and benched exhibits from the Friday through to the Sunday. Orchid enthusiasts wishing to add to their collection will be able to purchase orchids from the many Australian and international vendors.

All activities, including the Conference Dinner, are planned to be held at the Crestmead venue.

The show schedule, conference program and registrant application forms should be on the [orchidsaustralia.com.au](http://orchidsaustralia.com.au) website soon.

It is anticipated that early-bird registrations will be available from 1 September 2019.

To receive *For the Love of Orchids* - AOCC 2021 updates, please provide your name and email address to: [aocc2021@gmail.com](mailto:aocc2021@gmail.com)

A range of accommodation types is available at nearby Springwood, Browns Plains and Calamvale.

Spending some time at the Gold and Sunshine Coasts, their delightful hinterlands, the Scenic Rim region, Tamborine and Toowoomba would make great AOCC 2021 add-ons.

## LIBRARY

An orchid book library is available for all members to use. Please ensure borrowed books are signed out by our Librarian, Joe Mercieca.
